Control Bar
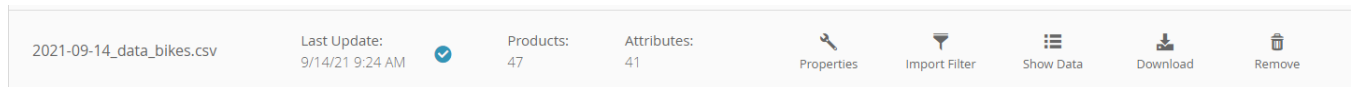

The control bar appears after a data file was uploaded successfully. Within this bar you can administer your file.

2021-09-14_data_bikes.csv	Last Update: 9/14/21 9:24 AM	✓	Products: 47	Attributes: 41	🔧 Properties	🔻 Import Filter	☰ Show Data	⬇ Download	🗑 Remove

Structure

The control bar includes some meta information and action buttons:

- **File name:**
  The name of the uploaded file

- **Last Update:**
  The date of the last successful upload/update of the file

- **Status icon:**
  A check mark icon indicates a successful upload, an exclamation mark indicates an upload with errors

- **Products:**
  Number of products within the file

- **Attributes:**
  Number of different attributes every product has

- **Properties button:**
  Opens a modal window where you can map some core attributes (displays important information in your product recommendations) to your data attributes. Furthermore you can define the character (sequence) to split multi values.

- **Import Filter button:**
  Opens a modal window where you can refine your data file. The **Include** filter reduces the data file to all products which match the selected attribute values. The **Exclude** filter removes all products which match the selected attribute values.
  That dialog is exactly the same you have already seen during the uploading process.

- **Show Data button:**
  Shows the uploaded product data table. That should be a 1:1 mapping of your uploaded file representation in Excel or LibreOffice.

- **Download button**:
  Downloads the currently used product data file.

- **Remove button:**
  This button removes the uploaded file completely and changes the view back to the **start view.**
