

# Page Titles

This page describes the report "Page Titles" in the section "Behavior".

## Page Titles (navigation events)

Check the report "**Page Titles**" to analyze how your users **navigated** through your Product Guides, i.e. how he used the **phase navigation** and the **previous / next buttons**..

Question	Answer
what does the event <b>questionGroup   next</b> or <b>previous</b> mean?	the "next" event is the e.g. "forward / next question" button of the Product Guide. The drill-down shows which phases showed up once the user selected the "next" button (and corresponding for "previous / back")
what does the event <b>questionGroup   to</b> mean?	the "to" event is a direct click on the phase navigation
what does the event <b>browserHistory   to</b> mean?	the browserHistory-Event is tracked if the user used the native <b>browser back or forward button</b> . The drill-down shows to which phase the browser back action navigated to.
what does the event <b>comparison   showComparisonTable</b> mean?	shows the number of clicks which opened the comparison view
what does the event <b>productlist</b> mean?	depending on the navigation options / pager / auto-scroll in your result list, there may be an event "productlist   page_forward". The event depicts how users navigated in the result list of the Product Guide
