

# Concept Board Action Bar

On top of the actual advisor concept, an action bar is placed containing two elements:

- Visualization
- Highlighting

## Visualization

The visualization menu item currently contains one element: Question & Attributes Connections. It opens a new browser tab and displays all Questions and their connected data attributes in several small graphs. This visualization serves as a quick overview which Question is connected with which attributes. If an expression mapping is used, multiple attributes can be connected to one Question.

## Highlighting

The highlighting menu item offers the possibility to mark certain elements in the *Concept Board* such as Answer Options without a data binding or mandatory question. That should help the user to easier find missing elements or specific configurations without looking in each concept object.

Below, all currently available elements are listed and described shortly. They are **separated by** their concept board **type** (Stage, Question, Answer Option) and detail view section to find the right configuration item more quickly.

### Stages

#### Visibility

##### Is invisible

Highlight all Stages which are deactivated, means not visible without any conditions (see [General Visibility](#)).

##### With visibility conditions

Show all Stages which have at least one [visibility condition](#).

#### Explanation

##### Without any explanation content

Mark all Stages which do not have an explanation title, an explanation text or an explanation image. If at least one of these elements is used, the Stage is not highlighted.

##### Without explanation text

Show all Stages which are not using an explanation text.

##### Without explanation image

Highlight all Stages which do not have an explanation image.

### Questions

#### General

##### Is multi selectable

Mark all Questions which allows the selection of multiple Answer Options (see [Single vs Multiple selection](#)).

##### Is mandatory

Highlight all Questions which have to be answered to progress within the advisor flow.

## Data Binding

### No data binding

Show all Questions which are not connected a one (simple or automatic mapping) or multiple (expression mapping) data attributes (see [Data Binding and Connections](#)).

### Simple option mapping

Highlight all Questions which use the [simple data attribute mapping](#).

### Expression option mapping

Mark all Questions which use the [expression data attribute mapping](#).

### Automatic option mapping

Highlight all Questions which use the [automatic data attribute mapping](#).

## Matching Reasoning

### With hard filter

Show all Questions for which hard filtering is enabled (see [filter settings](#)).

### Without reasoning

Mark all Questions which do not use any reasoning at all.

### With default reason texts

Highlight all Questions which use the default reason texts. Normally, these texts are only useful during the concept developing process and should be replaced by more context specific texts.

## Answer Option Type

### Is ordered

Show all Questions which have the Answer Option type [ordered](#).

### Is numeric

Highlight all Questions which have the Answer Option type [continuous numeric](#).

### Is boolean

Mark all Questions which have the Answer Option type [boolean](#).

### Is range selectable

Highlight all Questions for which the [range selection](#) toggle button is enabled.

## Visibility

### Is invisible

Highlight all Questions which are deactivated, means not visible without any conditions (see [General Visibility](#)).

### With visibility conditions

Show all Questions which have at least one [visibility condition](#).

### Has option hiding configuration

Highlight all Questions which use the [non-matching hiding configuration](#) for their Answer Options.

## Explanation

## Without any explanation content

Mark all Questions which do not have an explanation title, an explanation text or an explanation image. If at least one of these elements is used, the Stage is not highlighted.

## Without explanation text

Show all Questions which are not using an explanation text.

## Without explanation image

Highlight all Questions which do not have an explanation image.

# Answer Options

## General

### Is non-matching

Mark all Answer Options for which the non-matching mode is active. These options are not interfering the result list and not generating any reason texts (see [General Properties](#)).

## Data Binding

### No data binding

Highlight all Answer Options which are not bound to an attribute value via simple or expression mapping.

### Has unbound values

Show all Answer Options which are bound to an attribute value which is not part of the product data at all/anymore.

## Matching Reasoning

### Has alternative options

Highlight all Answer Options which have at least one [alternative Answer Option](#).

### With specific reasoning

Show all Answer Options for which a specific reasoning is enabled (positive or negative reasoning) and individual texts are defined.

### With default reason texts

Works similar like the condition above with the difference that all Answer Options are marked which have default/fallback reason texts defined.

## Visibility

### Is invisible

Highlight all Answer Options which are deactivated, means not visible without any conditions (see [General Visibility](#)).

### With visibility conditions

Show all Answer Options which have at least one [visibility condition](#).

## Preselection

### Has initial preselection

Mark all Answer Options for which the initial preselection is enabled. Means, the option is already selected when the Product Guide starts.

### Has conditional preselections

Highlight all Answer Options which have conditions which define when the Answer Option gets selected automatically.

## Explanation

### **Without any explanation content**

Mark all Answer Options which do not have an explanation title, an explanation text or an explanation image. If at least one of these elements is used, the Stage is not highlighted.

### **Without explanation text**

Show all Answer Options which are not using an explanation text.

### **Without explanation image**

Highlight all Answer Options which do not have an explanation image.
